

Vendor pitch deck

Your shop, **online.**

Vishu helps fashion vendors sell beyond walk-in traffic with a public shop profile, product discovery, cart, checkout, and order tools.

Start your vendor shop

The customer journey has moved to the phone.

Many customers browse online before deciding what to buy or which shop to visit. A store is limited by location and opening hours. Vishu gives vendors a digital window customers can open anytime.

Walk-in only

- Nearby customers
- Opening hours
- Products visible only in-store

With Vishu online

- Customers browse anytime
- Products stay visible
- Orders are more organized

Good products can be hidden by a manual selling process.

Hard to discover

New customers may never see the shop or product catalog.

Repeated questions

Photos, sizes, colors, prices, and stock are asked again and again.

Message orders

Orders can get mixed between chats, calls, and notes.

Manual stock

Availability is hard to keep clear when everything is offline.

Trust gap

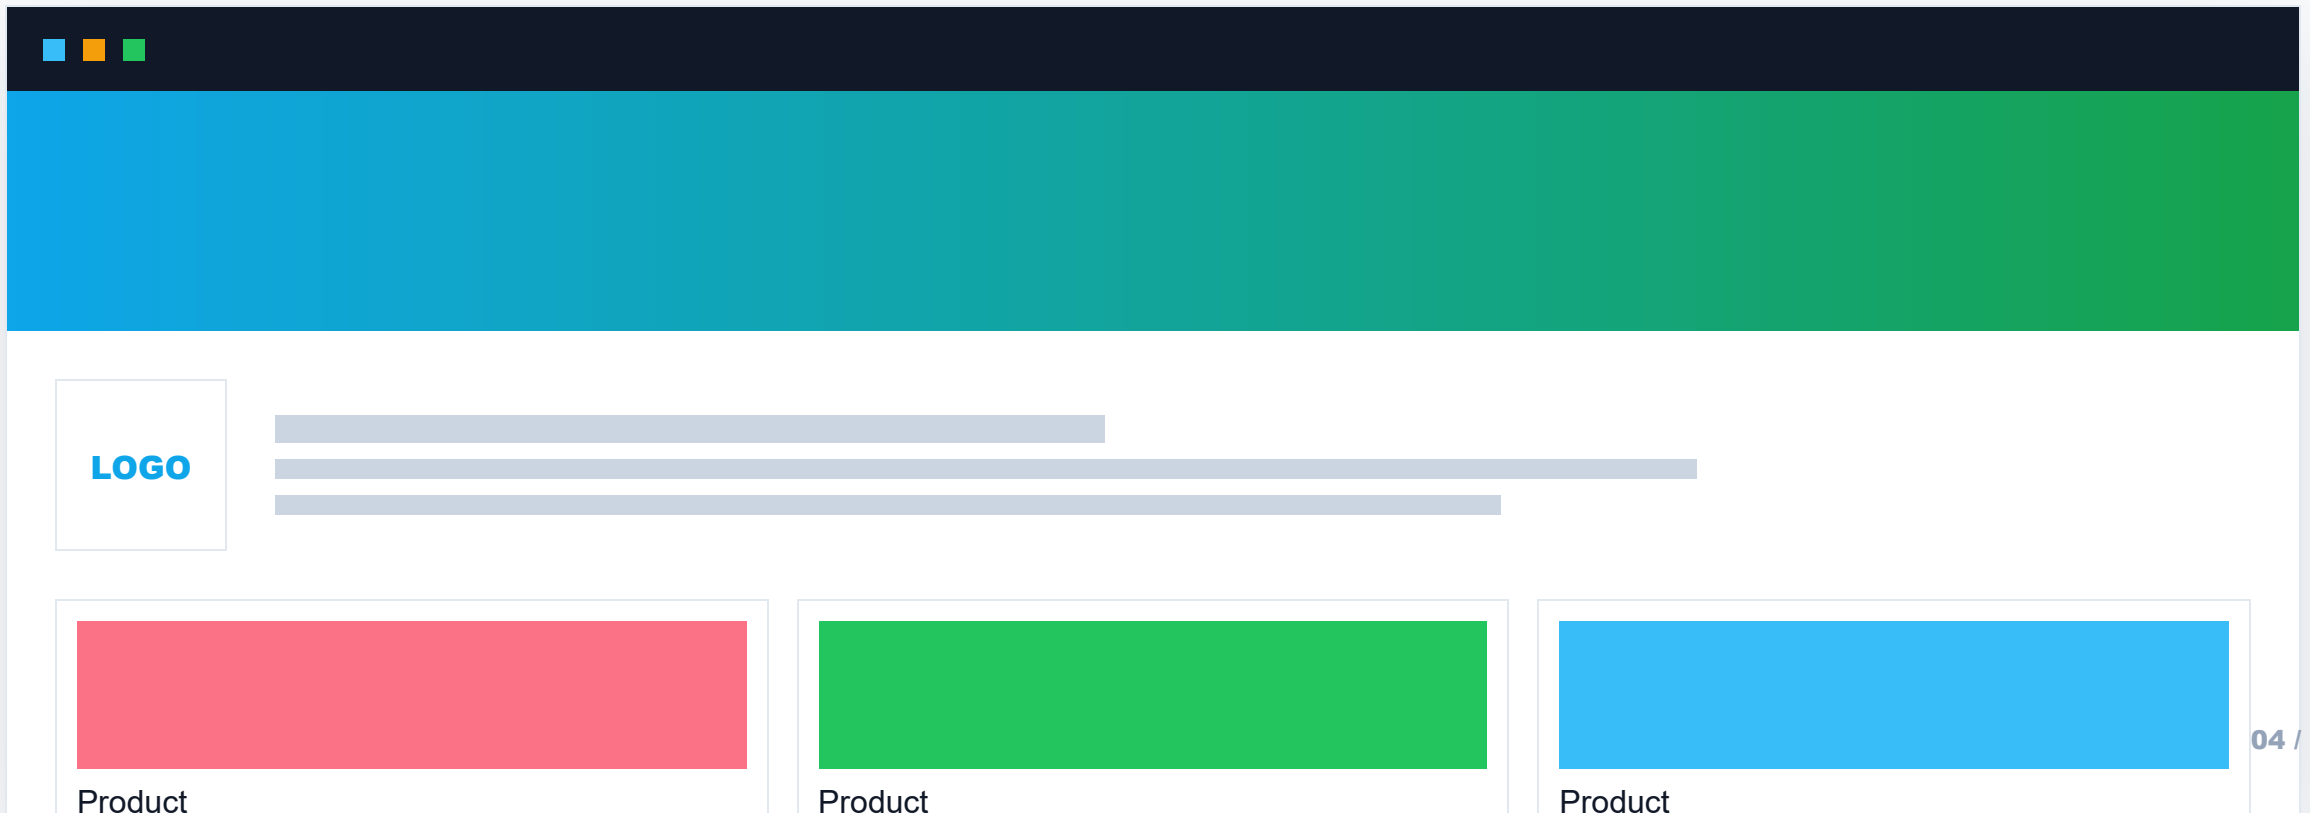

Customers need a professional shop profile before they buy.

Lost time

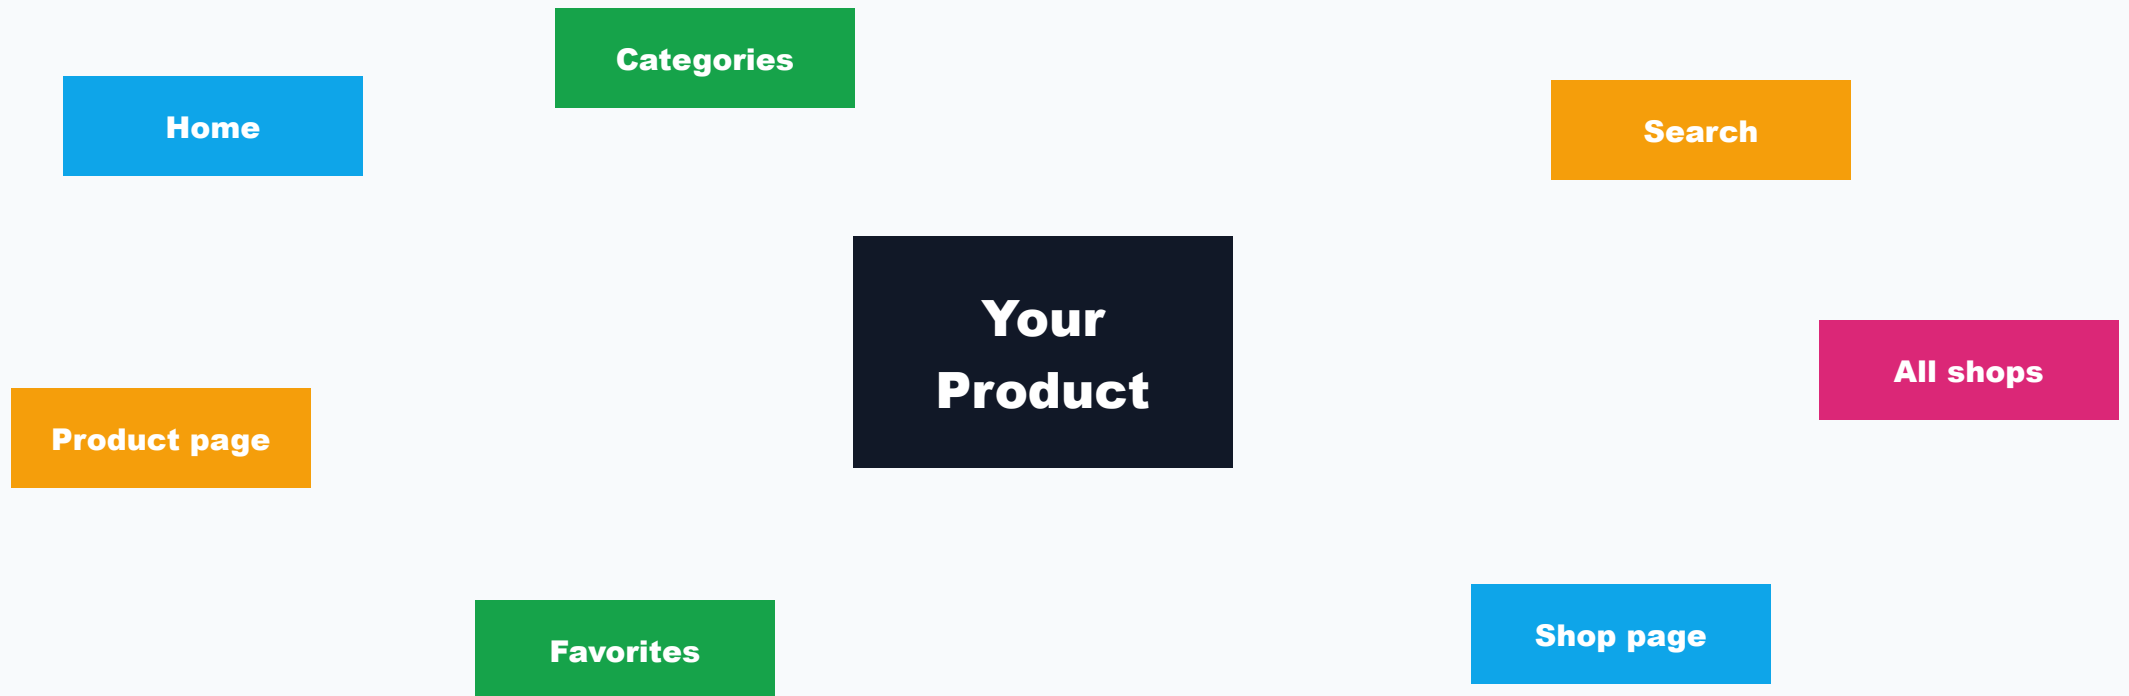

Vendors spend time repeating information instead of selling.

A digital shopfront inside a fashion marketplace.

Each approved vendor gets a public shop profile and product catalog customers can browse, trust, and order from.

One product. Many paths to attention.

More visibility creates more chances to sell.

Manage the daily selling flow in one place.

Vendor dashboard		
Products	Photos, prices, sizes, colors, stock	Publish / edit
Orders	Customer details and fulfillment status	Manage
Shop profile	Logo, cover, contact, shipping and returns	Update
Earnings	Sales and vendor totals	Track

Commercial terms are explained clearly before the shop goes live.

What vendors gain by joining Vishu.

More visibility
